

SKI CLOTHING RENTAL RATES WINTER 2020/21

Ski clothing, **disinfected by washing with ozone generators**, the most ecological and powerful alternative for disinfection and above all for the prevention of the spread of Covid19. Water purified by the ozone generator feeds the laundry machines, completely eliminating bacteria, and viruses that may remain in the fabrics to be cleaned. As no detergents are used, this system for cleaning and disinfecting fabrics is ideal for people suffering from allergies and for the environment, ensuring a perfect cleaning of the ski clothes and preserving their qualities of breathability and waterproofing.
